

BERNICA ENTERPRISES Ltd
Suppliers of high quality rock and mineral specimens from Canada.

ROCK SPECIMENS:

Basalt	Breccia	Conglomerate
Diorite	Gabbro	Gneiss
Granite	Greenstone	Limestone
Marble	Obsidian	Pumice
Quartzite	Rhyolite	Sandstone
Schist	Shale	Slate

MINERAL SPECIMENS:

Bornite	Calcite	Chalcopyrite
Chromite	Coal	Feldspar
Galena	Hematite	Magnesite
Magnetite	Malachite	Mica
Molybdenite	Pyrite	Quartz
Serpentine	Sphalerite	Talc

SIZE/PRICE:

	<u>Rocks</u>	<u>Minerals</u>
Small – approximately 4 cm by 3 cm.	\$ 0.90	\$ 1.20
Medium - approximately 5 cm by 4 cm.	\$ 1.45	\$ 1.75
Large - approximately 8 cm by 5 cm.	\$ 2.00	not available
Extra-large - approximately 12 cm by 8 cm.	\$ 3.00	not available

PACKAGES:

K3 Resource unit – includes 13 different large rocks and minerals. Individually packaged in labeled bags, with a reference sheet and description. The specimens include examples of the three rock groups and two minerals. These are: Igneous rocks (obsidian, granite, basalt, pumice); Sedimentary rocks (sandstone, limestone, conglomerate, shale); Metamorphic (slate, marble, gneiss); minerals (magnetite, feldspar).
Price: \$ 26

Grade 5 set – includes 49 small specimens, composed of 6 numbered samples of each of 4 different rock types and 5 numbered samples of each of 5 different minerals. Specimens are in labeled bags, with a reference sheet and description. This set includes 5 sulphide ore minerals: molybdenite (molybdenum ore), sphalerite (zinc ore), pyrite (iron and gold ore), galena (lead ore) and chalcopyrite (copper ore). Also included are a suite of rock types: Metamorphic (slate), Igneous (granite), Sedimentary (limestone, sandstone).
Price: \$ 45

Earth Science 11/Geology 12 set – includes 14 different large rocks and minerals, individually packaged in labeled bags, with a reference sheet and description. The Igneous rocks included are obsidian, granite, rhyolite, basalt, basalt (vesicular), pumice and gabbro. For Sedimentary rocks the suite includes sandstone, limestone, conglomerate and shale. Metamorphic rocks are represented by schist, slate and gneiss.
Price: \$ 42

Note: the selection of specimens in each set may vary depending upon availability.
